C02	I meet you in the end	Encontro você no final	<p>common citizen of the new Brazilian middle class, recently graduated in social communication, who is forced to work with projects in which he does not believe.</p> <p>The script began to take form from the final scene, inspired by a real story that occurred in China: a man goes to the top of a bridge to attempt suicide. From that image on, the story, which takes place in Belo Horizonte, was built backwards, with the help of histories of real cases on the streets of the capital of Minas Gerais.</p> <p>Clarice Lispector's literary work "A Hora da Estrela", Georges Didi-Huberman's Image Theory and Giorgio Agamben's Theory of Biopolitics were references to the writing of the script. These theories allowed a reflection on fundamental aspects of the short film, such as issues of the female image, political, economic, cultural and social exclusion and low paid work, which does not reflect in social interests.</p> <p>Completely produced in Belo Horizonte, the project had a constant dialogue with the "voice" from the streets and the community. One of the writers (Louraidan) works with writing based on the hearings that comes from the streets and more specifically inside buses (facebook.com/escafandrista). E01	Grundrauschen	Grundrauschen	Looking at the underlying decision making processes, the methods and questions of making the news, the film reveals the inner workings of the dpa. „Noise“ observes the 'news dealers' of the dpa in different situations: at conferences, during training workshops, in the kitchen, smoking, editing texts. The film pieces together the picture of an agency which has to keep producing news for their clients, without break. The constant stream of news never ceases – no matter what happens. Each day the dpa dispatches 1000 announcements, 1900 images, numerous graphics, audio and video clips. Thus, it shapes what we see of the world, without being seen – since it does not have to be named as a source. The kaleidoscopic structure of the film and the observing camera, inspired by direct cinema, reflect the work and structure of the dpa and allow the viewer to delve into the world of news making.	1:22:00	Germany	Friedrich Rackwitz	Simon Baumann		Escolas
